¹⁸ **WorldPublicOpinion.org/Chicago Council on Global Affairs 2006-2007**

There is a controversy over what the countries of the world, including [survey country], should do about the problem of global warming. Here are three statements. Please tell me which statement comes closest to your own point of view.

	Until we are sure that global warming really is a problem, we should not take any steps that would have economic costs	The problem of global warming should be addressed, but its effects will be gradual, so we can deal with the problem gradually by taking steps that are low in cost	Global warming is a serious and pressing problem. We should begin taking steps now even if this involves significant costs	DK/NS
